WELCOME TO THE EGYPT MINING FORUM

Hosted by the Ministry of Petroleum and Mineral Resources and backed by the Egyptian Mineral Resources Authority (EMRA), the Egypt Mining Forum 2025 is the premier platform driving Egypt’s ambition to become a global mining leader by 2040.

Bringing together government officials, industry leaders, investors, and exploration companies, the forum will foster partnerships and strategies to accelerate sector growth. Recent regulatory reforms have boosted foreign investment, with new exploration licenses increasing by over 25% in the past year. Infrastructure upgrades and digitized permitting are further reducing costs and streamlining operations.

With Egypt’s mining GDP contribution set to rise—driven by key commodities like gold, phosphate, and rare earth elements—the country is solidifying its role in a market that values stable, responsibly sourced raw materials. Egypt’s Sukari Gold Mine alone saw a 10% production increase in 2024, reflecting rising investor confidence.

As global demand for minerals intensifies, the industry faces pressures around sustainability, resource efficiency, and technology adoption. The Egypt Mining Forum 2025, taking place in Cairo from 15–16 July, will serve as a hub for strategic discussions, policy shaping, and cross-sector collaboration. By building on the momentum of past editions, this event will help define a more resilient, efficient, and sustainable future for mining.
