SHAPING THE FUTURE OF

MINERALS AND METALS IN EGYPT AND BEYOND

EGYPT MINING FORUM 2027

A NATIONAL MINING AMBITION FOR GLOBAL INVESTMENT

Egypt's objective is clear: to convert mineral potential into investment, discoveries, operating mines and higher-value industries, supporting our ambition for mining to contribute 6% of national GDP. We are building a competitive, integrated sector in which geology, infrastructure, energy and modern regulation create the foundations for investment, while exploration, project development, processing and manufacturing reinforce one another. Egypt Mining Forum will give serious investors direct access to the opportunities and government engagement required to move projects forward. ”

HE ENG KARIM BADAWI

Minister of Petroleum and Mineral Resources
Arab Republic of Egypt

EGYPT
MINING

HOSTED BY

EGYPT'S MINING AMBITION IS MOVING INTO EXECUTION

A more investable framework is bringing one of the world's most prospective underexplored regions closer to global capital and capability.

Egypt is advancing a mining proposition of growing international consequence. Its position across the Arabian Nubian Shield places significant gold, base metal, critical mineral and industrial mineral potential within reach of established infrastructure, competitive energy and direct access to major trade routes.

The market is also being reshaped above ground. Reform across licensing, fiscal structures, investor services and geological data is intended to create greater clarity across the investment lifecycle, while the national focus on mineral processing is extending the opportunity from extraction into higher-value industrial development.

Egypt Mining Forum is where this ambition is tested against capital, capability and commercial reality. It convenes the institutions defining the market with the mining companies, investors, explorers, technology leaders and project partners capable of developing it.

For companies assessing where the next generation of mining growth will emerge, Cairo is becoming an increasingly consequential place to be.

A GLOBAL MINING COMMUNITY CONNECTED TO EGYPT

One forum connecting policy, investment,
exploration, technology and project delivery.

8,000+

MINING PROFESSIONALS

TECHNICAL SESSIONS

A NEW MINING ECONOMY IS TAKING SHAPE

Position your portfolio within the relationships, projects and procurement priorities defining what's next.

The development of a competitive mining jurisdiction depends on far more than mineral endowment. It requires geological intelligence, exploration capital, project finance, engineering, equipment, processing technology, infrastructure and operating expertise to converge around viable opportunities.

Egypt Mining Forum brings that ecosystem into one exhibition. International and regional companies engage directly with the government authorities, mining houses, explorers, developers and investors determining how opportunities across Egypt and the Arabian Nubian Shield will move from licence and resource definition into construction, production and value addition.

EXHIBITOR PROFILES

- Government, regulators and geological institutions
- Mining, exploration and project development companies
- Investors, banks, funds and advisory firms
- Geoscience, surveying, drilling and laboratory services
- Mining equipment, extraction and site technologies
- Mineral processing, metallurgy and plant solutions
- Water, power, infrastructure, ESG and environmental services
- Logistics, supply chain, workforce and operational services

**ESTABLISH
RELEVANCE NOW,
WHILE THE MARKET'S
COMMERCIAL
LANDSCAPE IS STILL
BEING DEFINED.**

BENEFITS FOR EXHIBITORS

BUILD MARKET
POSITION BEFORE
THE PROJECT
PIPELINES ACCELERATE

DIRECT ACCESS TO
THE MARKET

Engage the government leaders, regulators, mining companies, explorers and investors setting the direction of licensing, investment and project development across Egypt.

COMMERCIAL CONVERSATIONS
AT DECISION LEVEL

Advance market-entry discussions, strengthen partner and distributor networks, qualify project demand and build senior relationships before procurement strategies and supplier positions become established.

INTELLIGENCE FOR MARKET
ENTRY AND GROWTH

Read the market through the people shaping it. Understand how policy, geological priorities, investment structures and exploration activity are translating into demand for capital, technology, infrastructure and mine-development capability.

6%
of GDP by 2030

Egypt has set an ambition to significantly increase mining’s contribution to GDP this decade, signalling an accelerated push to build a competitive mining economy.

131% | ↑
year-on-year revenue growth

\$446 million
mineral resource development revenue

Reported as of July 2025, alongside ongoing reforms aimed at attracting exploration and strengthening investment competitiveness.

Sectors represented:

- Exploration & Drilling
- Geoscience & Data
- Equipment, OEMs & Technology
- Processing, Metallurgy & Plant
- EPC & Project Delivery
- ESG, HSE & Sustainability
- Logistics, Supply Chain & Site Services

THE INTELLIGENCE SHAPING EGYPT'S NEXT GENERATION OF MINES

Where the investment conditions above ground meet the mineral systems below it.

STRATEGIC CONFERENCE

Mining markets are built through the interaction of policy, geology, capital and execution. Egypt Mining Forum brings these forces into one conference platform, giving the industry a connected view of both the investment environment and the technical realities that will determine project viability.

The Strategic Conference examines the regulatory, financial and commercial architecture required to attract investment and develop a competitive sector. The Technical Conference addresses the geoscience, engineering and operating capability required to improve discovery, accelerate development and strengthen mine and processing performance.

Together, they move the discussion beyond mineral potential towards the decisions, partnerships and technical pathways through which productive assets are created.

POSITIONING EGYPT AS A COMPETITIVE MINING JURISDICTION

The quality of a mineral province alone does not determine the scale of investment it attracts. Competitive mining jurisdictions are built on regulatory clarity, investable fiscal structures, credible geological data, efficient investor pathways and the infrastructure required to move projects from discovery into production.

With large areas of Egypt's Eastern Desert remaining underexplored, the country is seeking to convert its world-class geology and reform momentum into committed capital, commercial discoveries, developing mines and downstream value addition.

The Strategic Conference will bring together government, investors and industry leaders to assess how far Egypt's mining reforms have progressed, what success should look like over the next three to five years, and what further action is required to translate investor interest into exploration activity and project development.

2027 STRATEGIC FOCUS AREAS

- Egypt's mining policy, regulatory and investment framework
- New licensing, exploration and partnership opportunities
- The geology and mineral systems of the Arabian Nubian Shield
- Gold, base metals, critical minerals and industrial minerals
- Financing exploration and moving discoveries towards development
- Mineral processing, local value addition and industrial growth
- Infrastructure, energy and logistics for competitive mine development
- International partnerships, responsible mining and market access

“

Investment decisions depend on credible data, transparent licensing and confidence in the route from exploration to development. MRMIA will use Egypt Mining Forum to engage directly with explorers, mining companies and technical partners on available opportunities, the frameworks governing them and the practical requirements for advancing the next generation of projects.

”

Yasser Ramadan
Chairman
Mineral Resources
& Mining Industries Authority

DELEGATE OUTCOMES

- Gain first-hand intelligence on reforms, licensing opportunities and Egypt's investment priorities.
- Access emerging projects and connect directly with the partners behind their development.
- Evaluate market opportunities, project viability and Egypt's position across global mineral value chains.
- Build high-level relationships with government, investors and industry leaders who can advance projects.

GLOBAL MINING SPEAKERS AND THOUGHT LEADERS

HE Eng Karim Badawi
Minister of Petroleum
and Mineral Resources

TECHNICAL CONFERENCE

TECHNOLOGY AND
ENGINEERING FOR
HIGH-PERFORMANCE MINING

The science, technology and engineering capability required to improve discovery and accelerate development.

Converting a geological target into a productive asset requires precision at every stage: stronger mineral-system understanding, better data, more effective targeting, disciplined resource definition and engineering capable of protecting value through development and operations.

The Technical Conference brings geoscientists, exploration teams, engineers, mine operators, technology providers and research institutions together around this execution challenge. Its programme examines the geology of Egypt and the Arabian Nubian Shield alongside the technologies and practices advancing exploration, drilling, processing, safety, productivity and resource recovery.

It is where technical evidence meets operating experience, giving the industry a serious platform to test methods, transfer knowledge and strengthen the capabilities on which commercially viable mines depend.

JOIN THE GLOBAL MINING COMMUNITY IN CAIRO

Egypt Mining Forum is designed for leaders making consequential decisions on market entry, investment allocation, exploration strategy, technology deployment and project development.

Across the Strategic Conference, Technical Conference, exhibition and senior networking programme, delegates can interrogate the policy environment, examine the geological and technical evidence, assess emerging commercial requirements and engage the organisations capable of moving opportunities forward.

The value is not simply access to information. It is the ability to read the market in context, challenge assumptions and leave Cairo with a more informed basis for action.
